Summary

Computer Science student graduating in 2026 with hands-on experience developing full-stack applications, RESTful APIs, and data-driven systems. Proficient in Java, Python, and modern web technologies, with experience in Agile development, software testing (PyTest), and AI-assisted development tools. Strong problem-solving skills with a focus on building scalable, user-focused applications. Seeking a Software Engineering role to contribute to high-impact systems.

Education

Bachelor of computer science

Anticipated 2026

Metropolitan State University of Denver, Colorado

- **Relevant Coursework:** Includes Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Database Systems, and Operating Systems, along with experience in mobile and web application development, API integration, and data visualization.

Technical Skills

- **Programming:** Java, Kotlin, Python, Ruby on Rails, C++, Arm
- **Web & Frameworks:** HTML, CSS, Flask, Ruby on Rails
- **API & Backend:** REST APIs, JSON, API integration
- **Testing:** PyTest, Unit Testing, API Testing, Integration Testing, Debugging
- **Data & Tools:** NumPy, Plotly, Seaborn, Tableau
- **Tools & Technologies:** Git, GitHub, Docker, Linux, Jira
- **Cloud & AI:** AWS(Basic familiarity), Chat Gpt, Copilot, Grock

Technical Projects

Concrete Services Web App | Flask-Python

- Developed a full-stack web application to manage customer service requests for a local business
- Designed and implemented RESTful APIs to handle form submissions and backend data processing
- Built responsive UI components to improve user experience and accessibility
- Debugged and optimized application performance through iterative testing

Music web App | Ruby on Rails

- Collaborated in an Agile Scrum team to develop a containerized web application
- Built a recommendation system that suggests music based on user mood inputs
- Integrated RESTful APIs and backend logic to manage user data and preferences
- Participated in code reviews, sprint planning, and daily stand-ups

Productivity Application | Flutter

- Developed a cross-platform mobile application in an Agile team environment
- Implemented gamification features to improve user engagement and task completion
- Improved accessibility through optimized UI design and high-contrast color schemes

Hyper Ring project | Java

- Implemented graph algorithms including DFS, BFS, and Kruskal's Algorithm
- Designed efficient traversal and spanning tree solutions for optimized pathfinding
- Strengthened understanding of data structures and algorithm optimization
